

MAINSAIL™ MAXIMIZES YOUR TERMINAL'S EFFICIENCY WITH LIGHTNING FAST GATE PROCESSING, INSTANT INFORMATION AND PROACTIVE CUSTOMER SUPPORT.

Advance your operation to the next level of efficiency, productivity, and profitability using **Mainsail Terminal Management System®**.

This easy-to-use terminal operating system manages every component of container terminal operations. Mainsail combines the best practices of hands-on terminal management with secure, reliable Internet-driven technologies.

Mainsail is a highly optimized system that allows you to process containers at the gate faster than ever before while also quickly accessing the information you need for any part of your operation. The system offers flexible workflow tools and comprehensive integration with other business-critical systems and partners.

With full-featured modules available for billing, Container Freight Station (CFS) activities, and rolling stock operations, Mainsail truly delivers on all your terminal needs. Designed with you in mind, Mainsail is the most reliable choice to move mountains of cargo.

BROWSER-BASED INTERFACE is designed to minimize keystrokes and improve processing speed. Terminals find it easy to get started and efficiently manage transactions.

INSTANTLY FIND THE INFORMATION YOU NEED using Mainsail's flexible search tools that allow you create custom searches and save them for repeated use.

INTEGRATION WITH THIRD PARTY TECHNOLOGIES offers seamless data communication between all business critical components at the terminal for improved efficiency, accuracy, and data visibility.

COMPREHENSIVE, FLEXIBLE REPORTING provides the real-time data you need on-demand to improve your operation.

MAINSAIL ONLINE gives customers and partners access to selected terminal data to through an intuitive Web interface for enhanced, instantaneous communication.

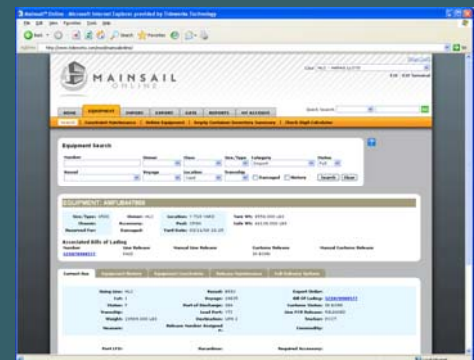

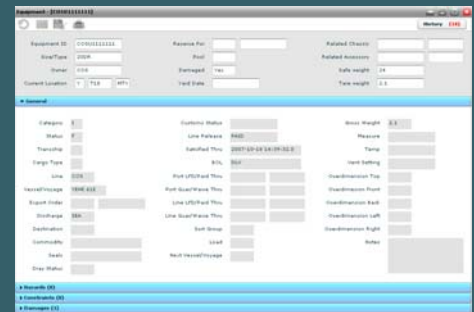

"RO-RO" MODULE gives you the flexibility to create virtually any cargo type and manage all of your rolling stock and other non-containerized.

BILLING MODULE enables you to establish tariff and contract rates for all billable services, log service requests, generate invoices, and accept payment either online or at the terminal. All billable events can be sent to the general ledger/accounting system.

CFS MODULE provides full-featured Container Freight Station functionality, including receipt and delivery of LCL cargo, tracking and inventory control, and container stuffing and unstuffing.

MAINSAIL
TERMINAL MANAGEMENT SYSTEM®

CONFIGURATION OVERVIEW

MAINSAIL SERVER

- Includes the following modules:
 - Gate & yard management
 - Active inventory control
 - Billing and transaction tracking
 - Advanced report and auditing tools
 - Workflow and scheduling tools
 - CFS operational control
 - Full-featured Ro-Ro module
 - Electronic Data Interchange (EDI) support

MAINSAIL ONLINE

- Includes the following modules:
 - Online reporting
 - Remote bookings management
 - Trucket tools

MAINSAIL ASP

- Server and applications hosted and managed by Tideworks
- Includes same modules as Mainsail Server
- Includes service level agreement for guaranteed performance

TECHNICAL REQUIREMENTS

MAINSAIL SERVER

The level of forecasted data communication and transaction volumes varies greatly from terminal to terminal. Tideworks offers a specification for Mainsail hardware requirements after completing its initial requirements analysis of a terminal operation to ensure it is properly scaled to the terminal's immediate and future requirements.

MAINSAIL ONLINE SERVER

- 2 GHz CPU
- 2 GB RAM
- Windows 2003 Server R2

MAINSAIL CLIENTS

- Dual Core CPU+
- 2 GB RAM
- 10 GB System/10 GB Application HD
- Windows 2000 or XP
