# GATE VISION®

INCREASE GATE VELOCITY WITH A FLEXIBLE, **AUTOMATED** GATE SYSTEM

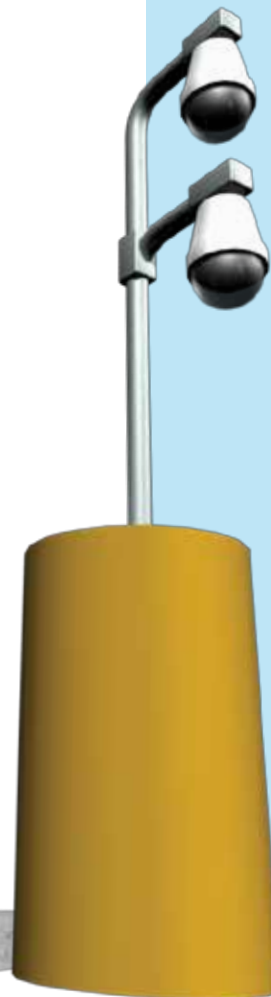

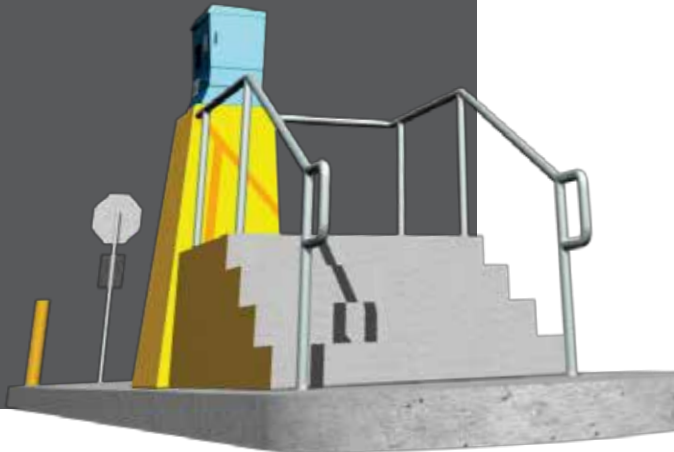

Accelerate Gate Activity
Process gate transactions two to three times faster with GateVision's intuitive software controls and efficient hardware design.

Reduce Operating Costs
One clerk can service multiple truck lanes, multiple gates, or even multiple terminals, making the best use of costly resources.

Improve Worker Safety
Gate clerks can move away from truck traffic in the lanes into a safer, healthier work environment in a remote call center.

ACCELERATE

Integrated software and hardware solution

- Straight-forward clerk interface, integrating the TOS, camera views, and user controls.
- Rugged, all-weather kiosks with off the shelf extended temperature components..
- Full-control (pan-tilt-zoom) cameras in the lanes.
- VoIP intercom system for voice communication between the driver and clerk.

Call center model

- Enables centralization of clerks in a call center either on the terminal or at an offsite location.
- Provides logical grouping of lanes, complete flexibility in assignment of users to call groups, and an efficient distribution of calls.
- Supports sharing of resources across multiple lanes, gates, or terminals.

Easy to use

- Dynamic camera views for container, chassis, and tractor plates are automatically activated as the user moves through the transaction.
- Save valuable processing time with auto-focusing cameras and color-coded key controls.
- Drivers walk through transactions easily using touch screen kiosks similar to bank ATMs.
- Manage by exception without clerk intervention.

Flexible, adaptable, and cost-effective

- Numerous device options available for kiosks: touchscreen displays, keypads, ticket printers, driver face cameras, barcode readers, biometrics and more.
- Integrates easily with OCR, LPR, RFID, and other technologies to automate data capture, increase accuracy, and further accelerate the gate.
- Cost effective to deploy with minimal investment required in hardware; you can start with a basic GateVision package and add more advanced technologies as your business grows.
