

ENHANCE PRODUCTIVITY AND OPERATIONAL CONTROL USING 3D DATA VISUALIZATION

Gain Full Operational Visibility

Monitor your complete terminal operations with a real-world scale model of your terminal and equipment.

Optimize Your Assets

Instantly view the location and idle time alerts for every piece of handling equipment at your facility to optimize utilization.

Enhance Terminal Productivity

Uncover patterns and trends in your data, visualize potential bottlenecks and take corrective action to increase your terminal's productivity.

VISUALIZE

Easy to Navigate

- Move through your terminal environment with intuitive keyboard and mouse controls
- Immediately locate a container or piece of equipment using the find feature
- Use the “fly by” feature to continuously cruise through your entire terminal

Operational Views

- View yard inventory, equipment moves and vessel or rail operations in real-time
- Use hover capabilities to view handling equipment and container details
- Watch equipment locations update in real-time when deployed with DGPS or other positioning systems*
- Monitor idle times for your UTRs and CHEs
- Select from two-dimensional or three-dimensional viewing options

Color Coding and Filtering Options:

- Move status and move type
- Vessel or rail operation and associated cranes
- Train visit
- Hazardous material

* Terminal View also works with systems not using DGPS or other positioning systems using “logical locations” to position equipment.

Realistic Graphical Views

Using real world scale, a model of your facility simulates, in real time, your terminal environment and immediately shows equipment positioning and details.

Vessel Operation Filter

Easily filter your yard by vessel or rail operations and apply color coding for each crane’s planned moves or hazardous materials.
