

# SIMPLIFY STOWAGE, YARD AND RAIL PLANNING WITH A SMARTER GRAPHICAL PLANNING SYSTEM

PLAN

## Reduce Vessel Turn Time

Planners can sequence discharge containers in a single click and calculate the most efficient load-back sequence automatically with Spinnaker's automated stowage.

## Eliminate Costly Stowage Errors

An intuitive user interface, color-coding options, and helpful alerts inform planners of hazardous, refrigerated cargo, re-handles, and other key data at-a-glance.

## Optimize Yard Space

Smart yard planning tools automatically designate the optimal spot for containers as they enter the terminal, reducing costly container shifts in the yard.

## Flexibility to work the way you work

- Easy to implement into your existing operations and easy to change as your operations evolve over time
- Offers a multitude of views and configuration options so that planners can view data the way they want to see it
- Easily customize the toolset available to each team member's role

## Automated storage

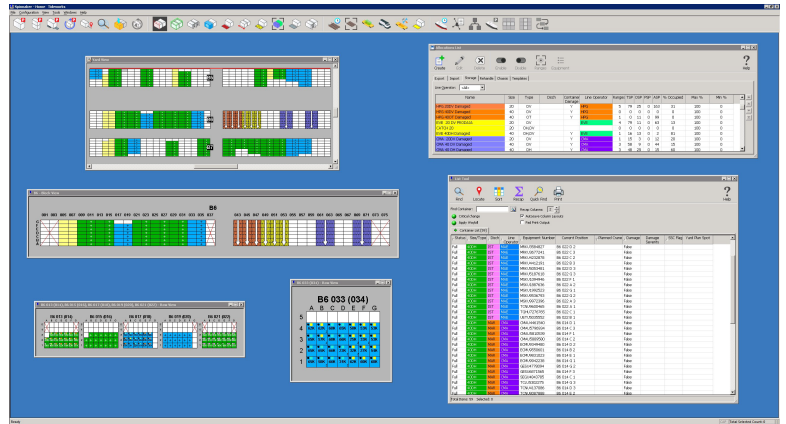

- Faster planning through full automation of the vessel planning process
- Creates an automatic load back sequence for vessel planners
- Alerts planners to potential yard bumps

## User-driven reporting

- Easily run custom reports of your own
- Flexible list and recap tools enable planners to quickly view data the way they want to see it
- Powerful Find Tool provides a quick method for searching container information. Searches can be saved for repeated use
- Historical reporting and analytics deliver valuable trending data on your operation

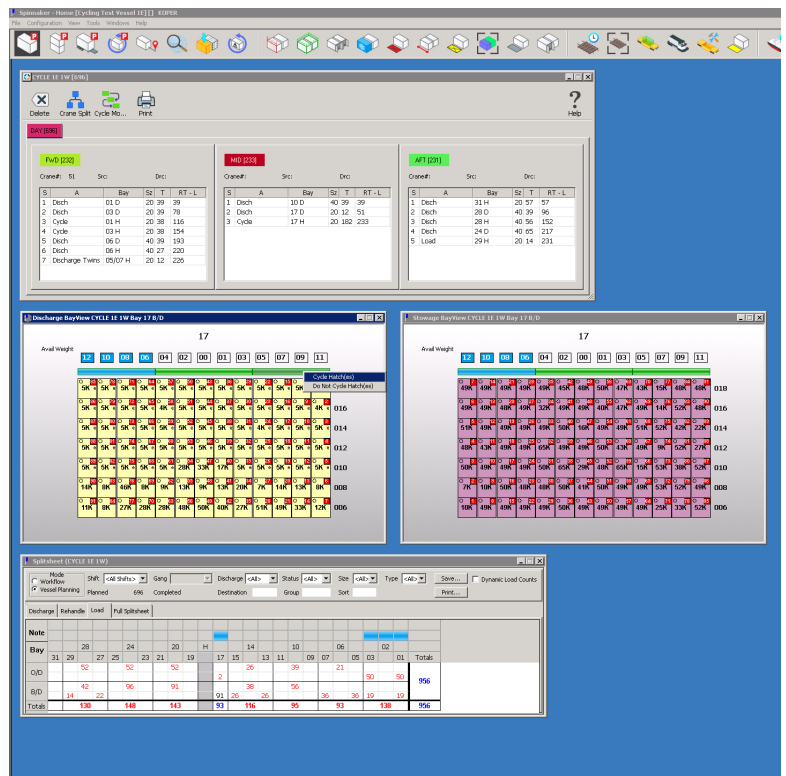

## Planning for all operations

- Vessel Planning & Autostow
- Vessel Workflow & Scheduling Tools
- Full support of cycling and twin-twenties
- Berth Planning
- Yard Planning with Yard Navigator
- Rail Planning
- Vessel, Yard, & Rail Editor
- Planning for ro-ro cargoes
- Electronic Data Interchange (EDI)
- Integration with Differential Global Positioning Systems (DGPS), handheld devices, and mounted mobile display units.

## Yard Planning

Flexible yard planning tools automatically select the optimal location to receive each container in the yard.

## Twining & Cycling

The twining and cycling tools make it easy to plan an operation for maximum efficiency and organization.
